VulnAssess - Security Assessment Report

SAMPLE FIXTURE DATA - NOT A REAL ASSESSMENT

Report ID: FIXTURE-0001

Target: 127.0.0.1 | Type: http

Started: 2026-01-01 00:00:00+00:00 | Status: completed

Scope and limitations

Authorized target only. Safe TCP discovery and/or single-response HTTP header checks; no exploitation, brute force, crawling, or destructive checks. Results require human validation.

Executive summary

Saved observations: 1 findings and 0 open services. Severity totals: Critical: 0 | High: 0 | Medium: 1 | Low: 0 | Informational: 0

Medium - HTTP header: Content-Security-Policy

ID: FIXTURE-FINDING-01 | Status: open | Confidence: high

Evidence: Fixture only: header absent in an illustrative response.

Rationale: Illustrative configuration observation; not proof of exploitability.

Impact: A browser defense-in-depth control may be absent.

Remediation: Review application behavior and deploy a tested Content-Security-Policy.

Methodology and disclaimer

VulnAssess records automated observations from selected safe checks. An open port or missing header is a configuration observation, not proof of vulnerability or exploitability. Validate findings with an authorized human reviewer.
